

Growing in Romania 

Premium Porc Group

Premium Porc Group, part of Premium Pork International A/S and one of the largest pig producers in **Romania**, is looking for an **experienced&ambitious individual** to manage the slurry operations for **+ 700,000 cbm of manure** produced/year in our pig farms located in different regions across Romania. The slurry is applied as natural fertilizer on agricultural lands owned by local farmers (approx. 20 % of produced manure applied on company's lands) using our modern specialized manure spreading machinery.

We are looking for: Manure Operations Manager

Ideal candidate has:

- ✓ Relevant experience within manure management operations; experience working in Eastern Europe represents advantage;
- ✓ Knowledge of manure application technologies and modern manure spreading machinery;
- ✓ Strong people skills and proven experience in coordinating and leading teams;
- ✓ Strong communication skills;
- ✓ Hands-on approach and willingness to spend considerable time on the field&travel between our farms;

Main responsibilities include:

- ✓ Plan and manage all manure related activities to empty storage capacities (lagoons) within available timeframes;
- ✓ Develop and implement a manure spreading plan for all locations;
- ✓ Manage and coordinate available team (team leaders, tractor & truck drivers, operators);
- ✓ Continuously monitor all manure spreading activities and make sure everything runs as planned;
- ✓ Analyze current activities, propose and implement improvements to increase efficiency and effectiveness;
- ✓ Ensure efficient and optimal usage of the specialized slurry machineries/ equipment;
- ✓ Implement training plan for all workers to ensure optimal machinery handling, smooth & safe operations;
- ✓ Develop, implement and monitor relevant working procedures;
- ✓ Maintain the relationship with local farmers and suppliers;

Job Title

Manure Operations Manager

Job Purpose

- Manage efficiently company's daily manure activities (storage, transport and spreading as natural fertilizer on agricultural fields) using best agricultural practices and in compliance with legal requirements and company's policies.
- Optimize current operations, develop and implement a manure management plan to ensure all produced manure is efficiently spread within available timeframes while applying best practices and taking into consideration available limitations: available lands, local farmers, agricultural seasonal works, legal time frame for spreading, weather conditions, storage capacities, available machineries and geographical dispersion of farms.

Main responsibilities include:

- Plan and manage all manure related activities to empty storage capacities (lagoons) within available timeframes;
- Develop and implement a manure spreading plan for all locations;
- Manage and coordinate available team (team leaders, tractor & truck drivers, operators);
