

Feed Safety for Food Safety®

## Join our free webinars!

We are pleased to invite you to our webinar series on **Mycotoxin Management, Early Nutrition & Piglet Performance**. Learn how to boost health and performance.

---

Reserve your free seats for the science-backed webinars.

June 2, 9:30 am (GMT+2) - Duration: 45 mins  
**DON a rising threat – strategies to mitigate the risk.**

---

Mycotoxins have become a worldwide and growing risk for healthy and economic animal production.

In this webinar, you will learn about the effects of mycotoxins such as DON and T-2 toxin on animal health and performance. You will also learn how to identify, assess, and counteract these risks at an early stage.

June 16, 9:30 am (GMT+2) - Duration: 45 mins  
**Early Nutrition: What are the benefits for broiler production?**

---

Early feeding of chicks is a hotly discussed topic. Not least since the changes in Dutch legislature, requiring feeding of chicks within 36 hours after hatch.

In this webinar we are going to discuss the effects of early feeding on chick development, microbiota composition and lifetime performance. Tune in and find out.
