Metagro LLC, Mongolia is searching Danish investors

Metaagro LLC is looking for experience pig producers to invest in a farm. Metagro LLC is building vertically integrated agriculture business model in Mongolia. Metagro is a part of MCS Group, the largest private enterprise in Mongolia. We have arable land (10,200ha) and livestock projects such as cattle feedlot (20,000 heads/year), pig farm (under development) and have plans for further expansion plans.

Since intensive livestock business such as pig/poultry farms are under-developed in Mongolia we need to introduce modern international technologies from countries such as Denmark, especially for the pig farm.

Our pig farm is designed by Danish Farm Design and we will import pig genetics from DanBred.
